

Technology Intelligence Service

Smart Utility Meter

Accurate and timely data, insight & analysis on vertical markets for the smart utilities industry.

Identify and maximize near and long-term opportunities across the industry with unrivalled market data and insights for electricity, gas, water and heat meters.

BENEFITS:

- The most comprehensive research on the smart meter markets: forecasts, market shares, regions, and products
- Market shares split across regions and meter types, including total market
- Four vertical markets covered across four regions each, including analysis of short and long term trends

Data

Market trackers and databases, delivered in Excel Tables including revenues, units, ASPs, market shares and products.

Report

Regular reports addressing key focus areas, market size and industry-level analysis.

Market Briefs

Shorter studies addressing key trends and updates throughout the year.

Analyst Access

For prompt responses to urgent and unique questions.

This service provides the most comprehensive research in the industry on smart utility meters; building on 15+ years of consistent methodology investigating the most important trends, drivers, and challenges affecting the current and future market for metering solutions.

The databases and reports provide critical forecast and baseline data on detail such as hardware type, region, and supplier shares for each vertical in the smart utility space: electricity, heat, water, and gas. Each update will be accompanied by an in-depth qualitative pdf analysis report, providing perspective on long and short term trends, policies, and other factors that are influencing the market. Global forecasts, trends in technology, supplier landscapes, market shares, and regional activity are all covered in these comprehensive reports.

Research Coverage

IHS Markit Technology Intelligence Service clients are supported by a continuous flow of research, presented in formats designed to make our insights, analysis, and advice succinct and easily accessible.

Analysis

Electricity Meters Report

Provides an analysis of the global electricity meters market and the latest progress of smart meter rollouts. The databases include data tables for 38 individual countries, along with regional-level analysis of measurement type, communication network/topology type and market share information. Data is presented in a five-year forecast including units, revenues and ASPs.

Gas Meters Report

Provides an analysis of the global gas meters market and the latest progress of smart meter rollouts. The databases include data tables for 30 individual countries, along with regional-level analysis of measurement type, communication network/topology type and market share information. Data is presented in a five-year forecast including units, revenues and ASPs.

Water Meters Report

Provides an analysis of the global water meters market and the latest progress of smart meter rollouts. The databases include data tables for 38 individual countries, along with regional-level analysis of measurement type, communication network/topology type and market share information. Data is presented in a five-year forecast including units, revenues and ASPs.

Heat Meters Report

Provides an analysis of the heat meters and heat cost allocator markets and the latest progress of smart meter rollouts for Asia Pacific and Europe, Middle East and Africa. The databases include data tables for 22 individual countries, along with regional-level analysis of measurement type, communication network/topology type and market share information. Data is presented in a five-year forecast including units, revenues and ASPs.

Trade Show Briefs

Highlights and trend analysis from some of the major metering events of the year, including Distributech and European Utility Week.

Topical Reports

Periodic, shorter insight reports looking at adjacent market trends and the potential impact on the metering industry. Recent topics include Smart Cities, IoT and Microgrids.
